## Basic Shoulder Mount Setup

- Loosen both the knobs of the Junction Adapter and insert 300mm long rod (Dia 15mm).

- Then properly tighten both the knobs, as shown in the image.

- Now loosen the knob of the grip handle and insert the left side of the 300mm long rod.

- Then properly tighten the knob. Repeat the same process for the other grip handle.

**NOTE:** It minimizes rotation while shooting video with your camera, making your shoulder comfortable and shots more stable.

- Now loosen the top knob of the junction adapter and insert the 300mm long rod (Dia 15mm).

- Then insert another 300mm long rod (Dia 15mm) and tighten the knob properly, as shown in the image.

- Now loosen both the knobs of the camera plate and insert the rods into the plate.

- Then properly tighten both the knobs, as shown in the image.

**NOTE:** Rubber padding on the camera base plate prevents the Camera from twisting or scratching.

- Now loosen the knob of the shoulder pad and secure it properly by inserting it into the rods.

**NOTE:** The shoulder pad has multiple 1/4"-20 threads, so you can mount other accessories too.

**NOTE:** The shoulder pad allows the Rig to sit comfortably on your shoulders by eliminating the discomfort caused by the Camera's weight on your shoulder during filming.

- Now loosen the knob of the shoulder pad and adjust it according to your requirement.

**NOTE:** You can tighten the rod support with this knob, offering easy and quick operation.

- Mount the Camera (Not-Included) on the shoulder pad and tighten it properly with the help of a screw driver.

**NOTE:** The Rig has a camera base plate that features multiple mounting threads for easy mounting on different plates and rigs. Also, it features a 15mm rod support and securely mounts your Camera using 1/4"-20 and 3/8"-16 camera mounting screws.

**NOTE:** Dual handgrip kit offers both comfort and balance with its two 360° rotatable handgrips that securely mount onto the rods with a 15mm rod clamp.

**YOUR PROAIM SNAPRIG BASIC SHOULDER MOUNT KIT
